

Project Design Phase-I Proposed Solution Template

Team ID	PNT2022TMID24481
Project Name	Project-Industry-specific intelligent fire management system
Team members	Pelluru Manasa , Chandhana RC , Deepika M , Polu Tejaswini reddy

Proposed Solution Template:

S.No.	Parameter	Description
1.	Problem Statement (Problem to be solved)	To improve the safety management system in industries. Improving the safety management system against the fire incidents in industries.
2.	Idea / Solution description	To implement the fire safety management in industry based on IOT using Arduino uno board with fire detection and fire extinguisher system. And using some sensors (Humidity sensor, Flame sensor, smoke sensor) with GPS tracking system.
3.	Novelty / Uniqueness	An Integrated system of temperature monitoring, gas monitoring, fire detection automatically fire extinguisher with accuration of information about locations and response through SMS notification and call.
4.	Social Impact / Customer Satisfaction	<ul style="list-style-type: none"> It early prevents the accident cost by fire in industries. Nearby locations so maximum extend more accurate reliability . Compatability design integrated system.
5.	Business Model (Revenue Model)	<pre> graph TD A((Fire detection using fire detector)) --- B((Accuration information about location and response through SMS and call)) A --- C((Industry-specific intelligent fire management system)) C --- D((Fire extinguisher automatically (sprinkle the water))) C --- E((Buzzer give warning)) D --- B </pre>
6.	Scalability of the Solution	<ul style="list-style-type: none"> This project can be used more efficiently with accurate information requiring. Easy operatability and maintenance. Required low time for maintain Cost is reasonable value.
